SKILLS

- Version Control Systems (Git & GitHub)
- Application Programming (Python, Java, Dart & JavaScript)
- Machine Learning Frameworks (TensorFlow & Scikit-learn)
- Amazon Web Services (Cloud Services)
- Relational Database (Postgres, MySQL, Oracle & SQLite)
- Data Analysis (Pandas, NumPy, Matplotlib)
- Figma
- Word and Excel
- HTML and CSS
- CSS Frameworks (Bootstrap & Tailwind)
- Web APIs (Flask & ASP.NET)

EDUCATION

Bachelor of Science in Computer Science
Technological Institute of the Philippines (Quezon City)

2020 - 2024

Cum Laude

LANGUAGES

English

Filipino

PROFILE

I am a computer science graduate and a certified AWS Solution Architect Associate with practical experience in cloud computing, software development, machine learning, and data science in which I am eager to apply and contribute to innovative solutions.

WORK EXPERIENCE

Cloud Engineering Intern

Feb 2024 - May 2024

Computrade Technology Philippines, Inc.

- Acquired proficiency in architecting cloud solutions on AWS, including core services and the Well-Architected Framework.
- Had a practical experience in deploying a simple CRUD website using EC2 instance and RDS database
- Contributed to the development of a contactless photobooth application leveraging AWS Cloud infrastructure.
- Presented the contactless photobooth application at the Digital Transformation Summit 2024.
- Earned AWS Certified Solutions Architect – Associate (SAA-C03) certification, demonstrating expertise in designing and deploying scalable, highly available, and fault-tolerant systems on AWS.

PROJECTS

KAMATISCAN (Thesis)

2023 - 2024

KamatiScan is a mobile application developed in Flutter & Dart. The application uses two Convolutional Neural Network models, GoogleNet and MobileNet, which are combined and implemented in Python to detect and classify tomato leaf diseases from captured or uploaded images.

KanonNet (Course Work)

2023 - 2024

KanonNet is a web application developed in Flask Python. The application implements Generative AI that allows artists to generate facial anime image based on their style preferences.

Zoofinity (Course Work)

Dec 2022 - Mar 2023

Zoofinity is a simple mobile application developed in Flutter & Dart. The primary feature of the application is to provide children an informative detail about the diverse habitat and species of animals in the Philippines.

Cafe Management System (Course Work)

Aug 2021 - Oct 2021

The app was developed in Java utilizing an object-oriented programming approach. It performs various operations, including adding, deleting, modifying, and creating inventory stocks, making transactions, and creating account information for users. The application uses MySQL to store data.

CERTIFICATIONS

AWS Solutions Architect - Associate

Amazon Web Services (AWS)

Issued Apr 2024 - Expires Apr 2027
